WWF[®]

WORLD WRESTLING FEDERATION

WrestleMania[®]

Defeat game with a single wrestler to become Intercontinental Champion.

Defeat game with all eight (8) wrestlers to become the New WWF CHAMPION!

Try different stick/button combinations for SECRET MOVES.

EXAMPLE MOVES:

ATTACKS:

From Standing:

T,T,POWER PUNCH = HEAD GRAB

From Head Hold:

A,T,T,POWER PUNCH = SPECIAL MOVE.

REVERSALS: (2X Damage)

When being held by the head, players can reverse attacks.

Example: U,D,D,POWER KICK

COMBOS:

Perform a variety of moves to build up COMBO METER.

Get opponent into HEAD HOLD to perform SPECIAL COMBOS!

RUN:

Press Punch and Kick together. Use Joystick to choose desired direction.

WWF WrestleMania KIT

SECTION
ONE

Operation

Safety Notices

The following safety instructions apply to all kit operators and service personnel. Specific warnings and cautions will be found throughout this manual where they apply. We recommend that you read this page, and also all of Section One, before preparing your kit for play.

CAUTION

Salvaged Parts. Parts salvaged from old games are required to complete your kit. These salvaged parts must operate perfectly; otherwise, the converted game can not perform properly or safely. Always repair circuit board malfunctions and cabinet damage before conversion is attempted.

Power Supply. Be sure the power supply from your old game is capable of +5V at 5A, -5V at 1A, and +12V at 2A. These operating voltages are necessary for your kit.

Monitor. This kit is not intended for use with X-Y monitors. Suitable monitors have horizontally mounted CRT-s and raster electronics with inputs for red, green and blue video, as well as Composite Negative Sync inputs.

Coin Mechanism. Be sure to clean and lubricate your old coin mechanisms. Servicing them is crucial to your game's earning potential and operation.

Coin Meters. Coin meters are not provided with this kit. Wiring information is provided as a convenience to the operator.

Servicing/Installing. Always turn your game OFF and unplug it before attempting to service or install your kit.

ATTENTION

PROPERLY ATTACH ALL CONNECTORS. *Make sure that the connectors on each printed circuit board (PCB) are properly connected. If the connectors do not slip on easily, do not force them. A reversed connector may damage your kit and void the warranty. All connectors are keyed to fit specific pins on each board.*

NOTICE - FCC COMPLIANCE STICKER

- I. THIS KIT WAS TESTED IN A MIDWAY UNIVERSAL VIDEO CABINET (MODEL 40135) AND FOUND TO COMPLY WITH FCC PART 15 CLASS A REQUIREMENTS. IF INSTALLED IN A MIDWAY UNIVERSAL VIDEO CABINET (MODEL 40135), THE FCC COMPLIANCE STICKER (16-9306) SUPPLIED IS TO BE PLACED ON THE REAR OF THE CABINET.

- II. INSTALLATION OF THIS KIT INTO ANY OTHER PRODUCT DOES NOT GUARANTEE COMPLIANCE WITH FCC REQUIREMENTS. YOU ARE SOLELY RESPONSIBLE, AND MIDWAY WILL HAVE NO RESPONSIBILITY FOR FCC COMPLIANCE FOR INSTALLATIONS IN OTHER PRODUCTS. THE FCC COMPLIANCE STICKER SUPPLIED SHOULD NOT BE INSTALLED ON THE CONVERTED PRODUCT UNTIL FCC COMPLIANCE IS VERIFIED.

EPILEPSY WARNING

A very small portion of the population has a condition which may cause them to experience epileptic seizures or have momentary loss of consciousness when viewing certain kinds of flashing lights or patterns that are commonly present in our daily environment. These persons may experience seizures while watching some kinds of television pictures or playing certain video games. People who have not had any previous seizures may nonetheless have an undetected epileptic condition.

If you or anyone in your family has experienced symptoms linked to an epileptic condition (e.g. seizure or loss of awareness), immediately consult your physician before using any video games.

We recommend that parents observe their children while they play video games. If you or your child experience any of the following symptoms: dizziness, altered vision, eye or muscle twitching, involuntary movements, loss of awareness, disorientation, or convulsions, DISCONTINUE USE IMMEDIATELY and consult your physician.

Conversion Procedure

Inspection

Unpack the materials from the carton and inspect for obvious signs of damage. Use this checklist to be sure your kit is complete.

[]	Wire Cutters		
[]	Black Electrical Tape		
[]	Quick-hardening Wood Putty		

Cabinet Modifications

1. Fill in gouges with a good quick-hardening wood putty. Sand cabinet and wipe it clean.
2. Repaint the cabinet with black semi-gloss paint. For games with wood grain sides: remove old decals and clean the glue residue before painting. Allow paint to dry completely.
3. Pencil a line roughly at the top of the old graphic. Lightly moisten the cabinet with soapy water. Apply the decal starting at the top and working down. After the decal is in place, smooth it down, taking care to squeeze out air bubbles. If an air bubble is missed, pop it with a razor blade or a pin and smooth it down. Allow 12 hours for the adhesive on the decals to set.
4. Check the kit for an FCC sticker. If this kit is installed in a Midway universal video cabinet (model 40135), the FCC compliance sticker (16-9306) supplied is to be placed on the rear of the cabinet. Installation of this kit into any other product does not guarantee compliance with FCC requirements. The FCC compliance sticker supplied should not be installed on the converted product until FCC compliance is verified.

NOTICE - FCC COMPLIANCE STICKER

- I. **THIS KIT WAS TESTED IN A MIDWAY UNIVERSAL VIDEO CABINET (MODEL 40135) AND FOUND TO COMPLY WITH FCC PART 15 CLASS A REQUIREMENTS. IF INSTALLED IN A MIDWAY UNIVERSAL VIDEO CABINET (MODEL 40135), THE FCC COMPLIANCE STICKER (16-9306) SUPPLIED IS TO BE PLACED ON THE REAR OF THE CABINET.**
 - II. **INSTALLATION OF THIS KIT INTO ANY OTHER PRODUCT DOES NOT GUARANTEE COMPLIANCE WITH FCC REQUIREMENTS. YOU ARE SOLELY RESPONSIBLE, AND MIDWAY WILL HAVE NO RESPONSIBILITY FOR FCC COMPLIANCE FOR INSTALLATIONS IN OTHER PRODUCTS. THE FCC COMPLIANCE STICKER SUPPLIED SHOULD NOT BE INSTALLED ON THE CONVERTED PRODUCT UNTIL FCC COMPLIANCE IS VERIFIED.**
5. Remove viewing glass and apply the game play instruction decal to the front of the monitor bezel. Be sure the decal does not obstruct the CRT.
 6. Place Epilepsy Warning Label on the front of the monitor bezel. Be sure that it does not obstruct the CRT screen but is in full view of the players.

Control Panel Modifications

IMPORTANT: Placement of joysticks must be horizontal to the control panel for proper playing capability (see control panel layout on page 1-7). Use template (16-10126) from kit, as a guide.

1. Remove control panel buttons, joysticks and old control panel artwork.
2. Use the full control panel template to design the control panel. Separate templates are located on the last pages of this manual.
3. Drill holes as needed for joysticks and control panel buttons. Plug previous holes with wood blocks, putty, cardboard or epoxy. File new holes smooth.
4. Carefully remove the backing on the control panel overlay. Place overlay on top of control panel. Prevent air bubbles from getting under overlay.
5. After the overlay is on securely, use a razor knife to trim excess and to cut holes for control panel buttons and joysticks. Then position stickers around the appropriate locations.
6. Being careful not to displace the stickers, place the clear overlay on the control panel. Use the torx head tamper resistant screws and the flat washers to attach the clear overlay to the control panel. Once the clear overlay is securely in place, cut holes for the joysticks and control panel buttons.
7. Remove switch from push button; grasp switch firmly on the left and right sides and squeeze prongs together, (do not grasp switch by the solder lugs). Carefully pull switch from housing. Unscrew nut from housing. Push switch housing through control panel from the front. Screw nut back onto switch housing from the back of the control panel. Carefully push switch back into switch housing.
8. To install the joysticks, remove the e-ring and slide the shaft and plastic ring off the joystick base. Be sure that the bushings remain in the base. Use the 8-32 bolts and the 8-32 nuts to attach the base to the underside of the control panel. Slide the plastic ring around the shaft so that the rough side is next to the shaft handle. Slide the shaft through the control panel and base. Replace the e-ring.

Control Panel Template

Control Panel Layout

INSTALL PC BOARD AND WIRING INTO A JAMMA CABINET

1. Replace the existing CPU board and sound board with the WWF CPU/Sound board. Use the 1/4" P.C.B. mounting spacers and surplus screws to secure the CPU/Sound board to the electronic rack, or to the inside wall of the cabinet.
2. If using the JAMMA cable provided with the kit, disconnect the old JAMMA cable from the speaker, power supply, control panel switches (which may already be disconnected) and the coin door. Remove the cable from the game. Leave the power chassis as is. **Note: If you choose to use your own JAMMA cable, check the JAMMA chart to be sure you cable is compatible.**

CAUTION

Properly insulate any unused wires within the JAMMA cable, especially the red, orange and yellow wires. This is a fully wired JAMMA cable. Many of the wires will not be used for this kit. These wires have been installed so that you can use this cable for future kits.

The operating voltages from the power supply should be as follows:

+5V @	5 Amp	(Red Wires)
-5V @	0.5 Amp	(Yellow Wires)
+12V @	2.0 Amp	(Orange Wires)

Note: All power supply voltages are + or - 5%.

3. Connect the JAMMA cable to the CPU/Sound board. Use the Cabinet Wiring Diagram for reference and solder the correct JAMMA cable wires to the speaker. Then, connect the wires to the coin door, power supply and the control panel. Player 1 has white-'color stripe' wires, except for the start button, which has a solid white wire. Player 2 has violet-'color stripe' wires. Use the Cabinet Wiring Diagram in section 3 for reference when connecting these wires to the player 1 and 2 control panel switches.
4. Connect the blue-'color-striped' wires to P12 of the CPU/Sound board. Use the Cabinet Wiring Diagram in section three for reference when connecting these wires.
5. Place the FBI Warning Label next to the CPU/Sound board. Be sure the label is completely visible.
6. Place the Copyright label next to the CPU/Sound Board. Be sure label is visible.

NOTICE - FCC COMPLIANCE STICKER

- I. THIS KIT WAS TESTED IN A MIDWAY UNIVERSAL VIDEO CABINET (MODEL 40135) AND FOUND TO COMPLY WITH FCC PART 15 CLASS A REQUIREMENTS. IF INSTALLED IN A MIDWAY UNIVERSAL VIDEO CABINET (MODEL 40135), THE FCC COMPLIANCE STICKER (16-9306) SUPPLIED IS TO BE PLACED ON THE REAR OF THE CABINET.**
- II. INSTALLATION OF THIS KIT INTO ANY OTHER PRODUCT DOES NOT GUARANTEE COMPLIANCE WITH FCC REQUIREMENTS. YOU ARE SOLELY RESPONSIBLE, AND MIDWAY WILL HAVE NO RESPONSIBILITY FOR FCC COMPLIANCE FOR INSTALLATIONS IN OTHER PRODUCTS. THE FCC COMPLIANCE STICKER SUPPLIED SHOULD NOT BE INSTALLED ON THE CONVERTED PRODUCT UNTIL FCC COMPLIANCE IS VERIFIED.**

INSTALL PC BOARD AND WIRING INTO A NON-JAMMA CABINET

1. Replace the existing CPU board and sound board with the WWF CPU/Sound board. Use the 1/4" P.C.B. mounting spacers and surplus screws to secure the CPU/Sound board to the electronic rack, or to the inside wall of the cabinet.
2. Leaving several inches of wire, cut the wires at the coin door, control panel switches (which already may be disconnected, speaker and power supply. Remove the harness from the cabinet. Leave the power chassis as is. **Note: Be sure that all spliced wires are well insulated with black electrical tape.**

The operating voltages from the power supply should be as follows:

+5V @	5 Amp	(Red Wires)
-5V @	0.5 Amp	(Yellow Wires)
+12V @	2.0 Amp	(Orange Wires)

Note: All power supply voltages are + or - 5%.

3. Install the JAMMA cable provided with the kit. Players 1 and 2, the coin door and the power supply wires are bundled together in individual groups. Insure that the cable is properly dressed and supported.

CAUTION

Properly insulate any unused wires within the JAMMA cable, especially the red, orange and yellow wires. This is a fully wired JAMMA cable. Many of the wires will not be used for this kit. These wires have been installed so that you can use this cable for future kits.

4. Connect the JAMMA cable to the CPU/Sound board. Use the Cabinet Wiring Diagram for reference and solder the correct JAMMA cable wires to the speaker. Then, connect the wires to the coin door, power supply and the control panel. Player 1 has white-'color stripe' wires, except for the start button, which has a solid white wire. Player 2 has violet-'color stripe' wires. Use the Cabinet Wiring Diagram in section three for reference when connecting these wires to the player 1 and 2 control panel switches.
5. Connect the blue-'color-striped' wires to P12 of the CPU/Sound board. Use the Cabinet Wiring Diagram in section three for reference when connecting these wires.
6. Place the FBI Warning Label next to the CPU/Sound board. Be sure the label is completely visible.
7. Place the Copyright label next to the CPU/Sound Board. Be sure label is visible.

Game Features

WWF WrestleMania is a one or two player game.

Starting Up

Switch ON power to the game. A "rug" pattern appears on the CRT screen. When the "rug" pattern ends, the screen shows a CPU Board map. Bad chips are indicated in red, good chips are in green. The software revision level is shown at the top of the screen.

NOTE: When an error is detected during Start-up Tests, game start-up does not progress, and an error message appears on the screen.

Insert the desired amount of coins or tokens.

Player Controls

- **Start Button**
- **Punch Button**
- **Kick Button**
- **Defense Button**
- **Power Punch Button**
- **Power Kick Button**
- **Joystick**

Menu System Operation

OPERATION

All Game Audits, Adjustments, and Diagnostics are options of the Main Menu. Each option, in turn, has its own menu, listing several choices that may be acted upon as desired.

To activate the Main Menu (shown below), press the test mode switch, or set DIP Switch #1, Switch 1 to the ON position. Game adjustments, bookkeeping, and diagnostics are all accessible from this menu.

Use any joystick to select desired menu option; press any control panel button to activate it. Notice that the options are highlighted in sequence.

Note: Only highlighted options can be activated.

Main Test Menu

DIAGNOSTIC TESTS

To enter Diagnostic Tests from the Main Menu, use any joystick to select the option; press any control panel button to activate.

Diagnostic Tests Menu

Switch Test

The Switch Test allows the operator to test the switches on the control panel and the coin door.

Select the Switch Test by using any joystick to select the option; then press any control panel button to activate. Pressing a switch on the control panel or coin door causes the corresponding switch location on the screen to light.

Switch Test Screen

To exit switch test screen, press start 1 and start 2 button simultaneously.

Dip Switch Test

The DIP Switch Test allows the operator to check the location of the two 8-position DIP switches on the CPU Board. The operator can also change the setting of each position of each DIP Switch during this mode.

To enter the test, use any joystick to select the option; press any control panel button to activate. The screen displays a layout of current DIP Switch settings.

To change a DIP Switch setting, move the switch to the desired setting, then check the screen to verify that the switch now shows the new setting.

Press any control panel button to exit the Dip Switch Test.

DIP Switch 1 Setting Table

	SW1	SW2	SW3	SW4	SW5	SW6	SW7	SW8

Not Used					Off* On	Off* On	Off* On	
DIP Switch Coinage CMOS Coinage								Off* On

*Indicates factory setting

Video Section Testing

The Video Section Test (much like the Start-up Test) allows the operator to check the RAMs and ROMs.

Highlight the Video Section Test by using any joystick to select the option; then press any control panel button to activate. When this test is activated, a "rug" pattern appears on the screen. The screen then changes to show the layout of the RAMs and ROMs on the CPU. Any chip shown as gray with a white outline should turn green during the CPU Test. During the test, chips are good if they turn green; they are faulty if they turn red.

Press any control panel button to exit the Video Section Test.

Sound Section Testing

The Sound Test allows listening to some of the sounds that the game is capable of producing.

To enter the test, use any joystick to select the option; then press any control panel button to activate.

Sound Test Menu

Monitor Patterns

The Monitor Patterns Test provides a menu for testing the monitor. Highlight the test by using any joystick to select the option; then press any control panel button to activate.

Monitor Patterns Menu

The **RED**, **GREEN**, and **BLUE SCREEN** tests fill the screen with either red, green or blue.

The **COLOR BARS** test fills the screen with several gradated colors to help with red, green and blue level adjustments. Each color should appear sharp and clear.

The **CROSSHATCH PATTERNS** test fills the screen with a grid and should be clear.

If any of the Monitor Pattern Tests shows a need for adjustment, use the proper controls on the Monitor Board.

Run Burn-in Test

The Burn-in Test continually repeats the Video Section Test. Use any joystick to select the option; then press any control panel button to activate. When the Burn-in Test detects an error, the test stops and displays an error message on the screen. Use this test to find intermittent CPU problems.

RUN BURN-IN TEST ARE YOU SURE?		
<table border="1"><tr><td>YES</td></tr><tr><td>NO</td></tr></table>	YES	NO
YES		
NO		

To exit this test, switch the game OFF then ON again.

COIN BOOKKEEPING

The Coin Bookkeeping Table records the coin box totals and game play counters. The left side of the table names the bookkeeping item; the right side shows the number of coins, credits or plays for each item.

Highlight Coin Bookkeeping by using any joystick to select the option; then press any control panel button to activate.

GAME ADJUSTMENT

The Game Adjustment menu option allows the owner/operator to change the Game Pricing and Game Difficulty. The activated item provides a setting choice. Highlight setting choice with any joystick, then press any button to lock setting.

Game Adjustment Menu

Standard Pricing

Standard Pricing allows the operator to choose any of the "Standard" selections for the Standard Pricing Table.

Custom Multipliers

Customize the internal coin chute multipliers for each chute.

Custom Pricing

Custom Pricing allows the operator to install pricing other than that of the Standard Pricing Table. Custom Pricing also allows the operator to select the amount of credits required to start a game and the amount of credits required to continue a game. This option is adjusted from the Dip Switch Settings.

Free Play

This option selects free play. The setting choices for this adjustment are:

- No (**factory setting**)
- Yes

Game Difficulty

Allows the operator to select the difficulty level of the game. The setting range is:

- Easiest: 1
- Hardest: 5
- Factory Setting: 3

Average Game Time

Allows the operator to control the overall average match time. The setting range is:

- Slowest: 1
- Fastest: 5
- Factory Setting: 3

Attract-Mode Sound

Determines whether the game will make sounds in the attract mode. The settings for this adjustment are:

- On
- Off (**factory setting**)

- (6) CREDITS TO CONTINUE
- (7) COIN PAGE HELP
- (8) SHOW CREDIT FRACTIONS
- (9) COINS PER DOLLAR
- (10) MAXIMUM CREDITS

Custom Pricing Menu

- (1) Coins inserted accumulate units. This adjustment specifies the number of units given for each coin in the left, right, 3rd, 4th, or bill validator chute (see "units/credit").
- (2) This is the number of coin units required to buy one credit.
- (3) One bonus credit is awarded after this many coin units have accumulated.
- (4) No credits will be awarded until this many coin units have accumulated.
- (5) Each player needs this many credits to begin a game.
- (6) Each player needs this many credits to continue a game.
- (7) Whenever standard pricing is used, a corresponding message is displayed on the credits screen. Setting this to no disables the message.
- (8) When set to yes, fractional credits will be seen on the credits screen.
- (9) The detailed bookkeeping screen shows total collections based on this many coins per dollar. (Set to zero to disable the display of money totals.)
- (10) This is the limit for the credits counter. Additional coins inserted will be lost. Factory setting is 30.

UTILITIES

The Utilities Menu allows the owner/operator to clear the games bookkeeping memory and to install a custom message. Highlight selection with any joystick, then press any button to lock setting.

Utilities Menu

After an item has been activated, you are given the option of resetting that item or not. For example:

Highlight setting choice with any joystick, then press any button to lock setting and return to the Utilities Menu.

HARDWARE INFO

Displays the name of the game, the serial number and manufacture date.

WWF UNIT	
SERIAL NUMBER:	XXXXXX
DATE OF MANUFACTURE:	MONTH DAY, YEAR

Press any control panel button to exit to the main menu.

REAL TIME CLOCK

Display or set the current time and date.

SELECT WITH ANY STICK
ACTIVATE WITH ANY BUTTON
DISPLAY
SET
RETURN TO MAIN MENU

Main Test Menu

ADJUST VOLUME

Move the joystick up to increase, or down to decrease the sound level of the game. Press any control panel button to lock the volume level and return to the Main Menu.

MAX
MIN

Press any control panel button to exit to the main menu.

Troubleshooting

PROBLEM

POSSIBLE SOLUTION

NO PICTURE OR DISTORTED PICTURE.

Check for faulty video board or monitor. Check for disconnected video signal cable.

TURN GAME ON & NOTHING HAPPENS.

Check line fuse. Check for +5VDC at pins C, D, 3, and 4 of the JAMMA Connector.

NO SOUND.

Check the speaker and speaker connection to pins L and 10 on the JAMMA Connector. Check volume control setting. Check for +12VDC at pins F and 6 on the JAMMA connector, also -5VDC at pin 5. Check interboard wiring on CPU Board.

NO GENERAL ILLUMINATION

Check cabinet wiring for open connections to G.I. bulbs. Check G.I. fuse, if present.

PRESS START BUTTON AND NOTHING HAPPENS.

Check for open wires between the button and CPU Board. Check for contamination on CPU Board pins or the button switch blade contacts. Check for proper ground.

NO CREDIT GIVEN WHEN COINS ARE INSERTED.

Check for contamination on coin switch contacts. Check for an open wire between Coin Switch 1 and pin 16 on the JAMMA Connector or Coin Switch 2 and pin T of the JAMMA Connector.

TOO MANY CREDITS FOR NUMBER OF COINS INSERTED.

Check Game Pricing setting. Check for a Short between pins T & 16 on the JAMMA Connector.

GAME STAYS IN THE TEST MODE.

Check that the Test Switch in the coin door and the Test Switch (Position 1) on DIP Switch 2 are set to Off.

OPTION 1

OPTION 2

!!WRONG WAY!!

Do not connect the coin switches in this manner. This circuit is INCORRECT, and will cause twice as many credits per coin.

WARNINGS & NOTICES

Warning

USE OF NON-MIDWAY PARTS OR CIRCUIT MODIFICATIONS MAY CAUSE SERIOUS INJURY OR EQUIPMENT DAMAGE! USE ONLY MIDWAY AUTHORIZED PARTS.

- * For safety and reliability, substitute parts and modifications are not recommended.
- * Substitute parts or modifications may void FCC type acceptance.
- * This game is protected by federal copyright, trademark and patent laws. Unauthorized modifications may be illegal under federal law. This also applies to MIDWAY logos, designs, publications and assemblies. Moreover, facsimiles of MIDWAY equipment (or any feature thereof) may be illegal under federal law, regardless of whether or not such facsimiles are manufactured with MIDWAY components.

Warning

NOTE: This equipment generates, uses and can emit radio frequency energy and, if not installed properly and used according to the directions in this manual, may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to Subpart J of part 15 of FCC rules which are designed to provide reasonable protection against such interference when operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference to radio communications, in which the user, at his or her own expense, will be required to take whatever measures may be needed to correct the interference.

Warning

Prevent shock hazard and assure proper game operation. Only plug this game into a properly grounded outlet. Do not use a cheater plug to defeat the power cord's grounding pin. Do not cut off the ground pin.

NOTICE - FCC COMPLIANCE STICKER

- I. THIS KIT WAS TESTED IN A MIDWAY UNIVERSAL VIDEO CABINET (MODEL 40135) AND FOUND TO COMPLY WITH FCC PART 15 CLASS A REQUIREMENTS. IF INSTALLED IN A MIDWAY UNIVERSAL VIDEO CABINET (MODEL 40135), THE FCC COMPLIANCE STICKER (16-9306) SUPPLIED IS TO BE PLACED ON THE REAR OF THE CABINET.
- II. INSTALLATION OF THIS KIT INTO ANY OTHER PRODUCT DOES NOT GUARANTEE COMPLIANCE WITH FCC REQUIREMENTS. YOU ARE SOLELY RESPONSIBLE, AND MIDWAY WILL HAVE NO RESPONSIBILITY FOR FCC COMPLIANCE FOR INSTALLATIONS IN OTHER PRODUCTS. THE FCC COMPLIANCE STICKER SUPPLIED SHOULD NOT BE INSTALLED ON THE CONVERTED PRODUCT UNTIL FCC COMPLIANCE IS VERIFIED.

Notice

No part of this publication may be reproduced by any mechanical, photographic, or electronic process, or in the form of a phonographic recording, nor may be transmitted, or otherwise copied for public or private use, without permission from the publisher.
